Rumble hockey best deck

What is your choice and why? Page 2Post a year ago 13 comments Rumble Hockey is the latest game from Frogmind Studios, a developer in Finland. Frogmind Studios has been behind badland brawl and Rumble Stars. Rumble Hockey has a similar line-up to the Rumble Stars and offers crazy gaming physics with epic animal characters in multiplayer hockey matches. In this Rumble Hockey Guide, we offer you all the tips to start your crazy journey with your favorite animals in the best possible way. After the successful launch of Rumble Hockey, Overview Rumble Stars, Rumble Hockey was finally released worldwide. This game, like its sister, received similar positive feedback. People familiar with Rumble Stars easily compare the similarity of the Rumlbers in both games. The biggest difference is the gameplay, which gives both games their own taste and twist. Rumble Hockey has much faster gameplay and different goalkeeping mechanics that require even more focus on building smart combos more than an opponent. With Rumble Hockey, you can play against players from around the world in real-time hockey battles. Earn coffins to open prizes and collect new epic Rumlbers. Buid and update your Rumber collection and battle deck. While the game looks relaxed with simple mechanics, it's really hard to control. Similar to the Clash Royale in this regard, you need to strategize and have a good knowledge of playing Rumlbers to score quick goals and move quickly up the levels. If you're new to this adventure haven't played Rumble Stars, fast-paced gameplay will surely surprise you at the beginning. If you're having trouble coping with the pace of the game, it's perfectly fine. We have all the tips and tips to guide you across the arenas of Rumble Hockey. Related – The 5 best football games for mobile startup If you know rumble stars, getting used to Rumble Hockey wouldn't be much trouble. The game follows similar game mechanics with an identical animal list. But this time, unlike football, your animals are playing hockey sticks running behind the puck. Rumble Hockey Gameplay Rumble Hockey is a PVP-oriented hockey match. Players must score three goals to win a match that lasts exactly three minutes. To do this, they need to create a team of eight rumblers by selecting from several animals. In addition, each animal has a role, cost and unique talent. Players use energy to play rumblers, which produce at a fixed speed, doubled at the last minute. The ties throw an extra ball onto the pitch, making it difficult for the goalkeeper to stop the attackers. Know Rumlbers In order to score goals and win, you need to have basic knowledge of every Rumber, their behavior on the field and turning them on correctly to ensure maximum scoring opportunities. Starter Kit Starter Kit 10 specific Rumlbers that you open at the beginning of the game. As you move further and further up the shares, you are opening up more and more specific rumors. In this Rumble Hockey Guide, we discuss 10 Rumlbers in detail and their style of play so you can build a team with a combination of Perfect Offense and Defense. Attackers Attacker Tiger He is a forced rumber in all your formations. One of your team's most important Rumlbers, the tiger has opened at the start of the game. As the name suggests, he shoots and scores most of the time. He also makes moves with the puck on the court and scirling it around to get to the perfect scoring position. Fast Speed allows him to get in front of the puck before the other players and moves around the field with his hockey stick. Lazy panda, as the name says, she is very lazy. He stays static on the field and makes very little movement. He shoots as soon as he gets the puck to his bat. You might want to place him close to the opposition's goal. When he shoots with the puck, most of the time he scores. Since he pays very less energy, that is, only three, he is a very quick and easy way to score when he unguarded.ie one of the players tackles the keeper. Sniper Wolf He's not open from the start, but you'll get him real soon. Sniper Wolf is a Superstar Rumber and thus costs more coins to upgrade. He's got average speed, but when he gets the ball, his shooting is an inch perfect. He's got an incredible amount of shot power and shooting accuracy. If you have a wolf in your team, use it carefully as it costs 5 energy and is therefore expensive. If your opponent uses a capable defender like Bull or Croc, they can often make the wolf useless. A faithful dog Provides a balance between strikers and defenders, a faithful dog takes the puck but does not shoot towards the opponent's goal. So never trust your dog to score because he won't. Even if it's an open goal, he doesn't shoot. On the other hand, he's really good at passing the puck and taking the puck from opponent Rumlbers. This is how he's your perfect midfielder! Being an excellent passer, he combines superbly with all the attackers in the game. A cheap and effective combination would be Faithful Dog and Lazy Panda. Defenders Croco moves on to defenders, he's one of the superstars you need in your teams. You don't have to update him at first. He's amazing and literally destroys all the rumors that come his way. With crazy chomp damage, you can trust him blindly whenever you want to get rid of opposition strikers from the field. He is the strongest defender for rookies and the perfect answer for Sniper Wolf. A raging bull Unlike Croco, he's a core player, so he's easy to upgrade. He tackles every opposition Rumber out of his way and doesn't care about anything. Croco and Bull don't give a about goals and just fuss. get away from the puck. Although he's not as deadly as Croco, he's a good option for your defense with his low energy costs of three. Magnetman He has to have, especially if you're a beginner. Magnetman pulls the opponent from a distance like a magnet and, moreover, it costs only three energy. He performs useful combinations of many strikers, such as Tigger, Panda, etc. He lures your opponent's Lion ie keeper and thus leaves the goal blank so the attackers can score. you can do two things with one shot through him, you can attack the enemy and at the same time create an advantage for you in the attack. Remember, despite all his skills, he's in place. Cannonman Another Rumber, unlocked at the start, Cannonman fires a cannonball at the opposition Rumlbers. He's not static and locks up one opposition Rumber and follows it with his cannonballs. Since his high energy cost is five, he is often unused compared to Croco and Bull. Mr. Fire Powerful Rumber, which explodes in contact with the opposition Rumber. He is effective when it comes to creating immediate damage and pushing the opponent further back. Since he only needs three energy, you can often use him alongside your other defenders to provide instant extra protection. Lover Similar to magnetman, Lover attracts opponent Rumlbers, which makes them useless. He is often useful for distracting an opponent's goalkeeper, while attackers can score easy goals. Although he is useful, his downside is that he is static and can often be nullified by opposition defenders moving away from his targets. He's the opposite of everything, so he's very handy in your lineups. Related - Rumble Stars Review: Setting up the Animals Meet Soccer Team Now that you're being introduced to Rumlbers, becomes a difficult part of building a deck. The perfect cover consists of an equally balanced attack and defense strategy with effective average energy costs. You need to make an assembly of eight rumber with up to four, which can be ready for use at the same time, and the rest will sit on the bench until Rumber or two are deployed. To start the rumber, you need to have enough energy that it needs for commissioning. Initially, there aren't many strategies for beginners to choose from and try, but we have two lineups to guide you through your first few wins at Rumble Hockey. First line-up In your first games, Croco is the most important Rumber. He is an important part of your game plan because he simply destroys the opposition Rumlbers, including a keeper who leaves an open goal for your strikers. Since Croco is expensive (6 energy), always consider before committing. Plus, you can use Bull and Cannonman against the opposition Striker Tigers to slow them down against you. By distracting the keeper, you can score quick goals with loyal dog and lazy panda's famous duo. No No Your crocodile, unless the opposition uses his Striker Tiger. Tiger is the op and the main striker in your lineup, so it should be updated. In order to better understand this configuration and how to play them, you can check this video from CRG. Second configuration This is a tutorial pack. A deck with no new Rumlbers, and everyone has to be. On this cover, focus on the combos between Magnetman and Sniper Wolf. Try neutralizing your opponent with keeper Mr. Fire and Cannonman and rely on loyal dog and Lazy Panda's most famous duo. Use Mr. Fire carefully as this may prevent the Strikers from scoring. Also, since you have the luxury of getting three attackers into your lineup, you can send a combination of striker Tiger and Mr.Fire to score a quick goal at the start. In the absence of Croco, Bull is your main defender, so use him properly to stop attacks from loyal dogs and attackers Use Magnetman to push Panda away near your goals. If you have an unguarded goal, use Mr. Fire immediately to block your opponent. In order to have a visual understanding of this configuration and how to play them, you can check this video from CRG. Update Rumlbers You can update Rumlbers as you earn more and more cards from a particular Rumber. Updating them will increase their stats and improve their gameplay, thereby guiding you to epic wins at Rumble Hockey. Rumlbers' upgrade costs vary depending on the rarity, meaning Core Rumlbers requires far fewer coins than Pro and Superstar Rumlbers. Update Core Rumlbers first because you get them a lot of cards and they are easy to update. Updating Pro Rumlbers and Superstar Rumlbers is more difficult, but their benefit at the upper levels is huge. It makes the difference between the game between you and your opponent. Although Core Rumlbers is the backbone of each cover, you need to take care of others as well. As a beginner, always update striker Tiger first. He's super-OP and your main striker. Updating him increases his shot power and he can shoot through the opponent's keeper and score. Next, update Raging Bull as he is your best defender and his tackles often win your match. Since the first few divisions focus mainly on the attack, update Panda and Dog next after the above two updates. Updating the panda allows him to score from long distances. An updated Mr. Fire kills an opponent's guard for one shot for the price of just three energy. Remember, you always need a strong defense as you advance up the division. Don't update rumors you're not going to play. It can be difficult at the beginning, but think twice about updating him. Otherwise, you're going to be short of gold. By updating Rumlbers will help you update the Keeper in addition to upgrading rumblers, you will get a decent amount of XP. After collecting enough XP, the goale will be updated. Adjusted keeper, with higher and mass is always useful by preventing you from conceding easy goals and guiding you to wins at Rumble Hockey. Related – Coronavirus and it affects mobile football games Manage your chest opening strategy After winning every match at Rumble Hockey, you will be rewarded with Chests. The chests are of different types and require a different opening hours. You will have to wait three hours to open Silveraranta and even longer rarer ones such as Gold, Colossal, etc. You often find the option to open the chest immediately by watching a 30-second ad. Opening the coffins will reward you with more Rumber cards, jewels and coins. Unlock the coffins immediately by watching ads Remember that ads are limited, can't you watch them every time to open the coffins immediately. Since you only have four places on your chest, plan their opening hours accordingly. Don't start a match where all your slots are filled because it leads to you not getting any prizes for winning because neither of your slots is empty. Open the coffins with jewels You can also use your jewels to open the coffins immediately, provided you have more than enough of them. But alternatively, you can also stop playing for about an hour and then return to the game in the hope that the ads will be available immediately on the chest. In addition to normal coffins, paint coffins are available daily. You have to score at least 10 goals, i.e. win at least four matches to open one. Rumble Hockey: Tips, Tricks and Strategies After playing the game in recent days, here's our bonus guide for beginners to climb quickly into the division at Rumble Hockey. 1. Focus on gaming and strategy Take care of your energy, never exceed Rumlbers. Use energy efficiently when using Rumlbers, which costs at least 5 energy to prevent running out of energy at a vital time. Shuddest first Rumble Hockey is a very fast game. You have to attack first to put pressure on your opponent. You never know which of your rumors can score. So put the attackers on the field And always make objections to your opponents. If you see that your opponent has Striker Tiger in hand, don't play your defenders against Bull or Croco until he plays against his tiger. Focus on the puck! Be very careful with the puck. The puck appears from both sides of the field. If it appears from the left side, you can be sure that you will send a goal, it will pop up from the right side. This is very important for gameplay as if you are playing in your attackers like Panda or Wolf, you have to pull rumblers in that part of the field to get the advantage. Note the slingshot damage to the Rumlbers. When you place Rumber over an opponent, it conflicts with the opponent, causing damage that is considered Sling Damage. The more brain damage, the more powerful Rumber is. Form configurations and try them out in the Training Arena. arena for your own good. Understand the combinations between the Rumlbers and watch them guide you wins at Rumble Hockey. 2. You have an effective chest opening strategy Save your gold, huge and other higher breasts while you sleep or you won't be in the game for a long time. In this way, you can time out your chest and decide accordingly when to open them. Run four Daily Quests to open Quest Completion Chest, which rewards you with more game resources and rumblers. 3. Join the club join the club and donate. At the club, you can ask for rumors and donate. Donate to your clubmates and get coins in return. Ask for rumors according to your game strategy, i.e. the ones you need for lineups. In this way, you can update your rumors faster. Understand which Rumlbers are more useful to you and update them accordingly. Update Core Rumlbers first, but don't update randomly because the coins run out. Conclusion After a successful Rumble Stars, Frogmind studios have managed to deliver another crazy and fun game of the same nature. Three-minute matches happen really quickly and are quite addictive. If you've played Rumble Stars before, you have a small advantage because you know the Rumlbers and how to play them. On the other hand, compared to Rumble Stars, Rumble Hockey is very fast. Rumble Hockey's keeper is much faster than the Rumble Stars version. The puck, which is also smaller in size, travels much faster than the ball. For people who begin their journey with Rumble Hockey, get ready for a fun and crazy ride. It's nothing you've ever been through. It's really crazy and it's hard for you to control and get used to its fast play. Understand Rumlbers, practice their combos and you will soon jump over shares with your favorite animals.
